

Food'n'Go: For elderly medical patients

WHAT
Develop, test and implement innovative ICT solutions for involvement and increased empowerment of older patients and their relatives.

WHY
42 % have low BMI and 50 % experience weight loss within the last 3 months
38 % have depression symptoms
21 % have dementia symptoms
Patients spend 17 hours per day in bed

WHO
Tove Lindhardt Damsgaard - nurse and clinical researcher with Herlev hospital
Hospital kitchen with Herlev hospital
Medical ward 0105, 0106 and 0107 with Herlev hospital
RegionH Innovationlab - funded the initial project.

MOVESCA

Fra jord til bord...

Mange køkkener producerer lækker mad og kører lean, økonomisk og effektivt med økologiske råvarer – og uden spild.

Men er vi sikre på, at maden ender i maven på de mennesker, der har allermost brug for den?

Fokus på hvad patienten eller borgeren rent faktisk får spist og drikket.

KØBENHAVNS UNIVERSITET

Hvad motiverer den enkelte?

MESTEREN: "Jeg vil have..."

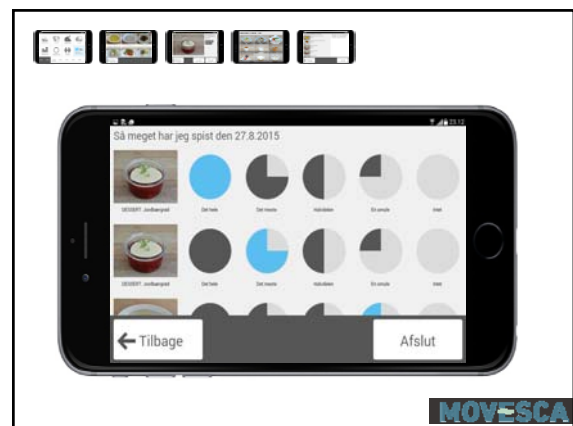

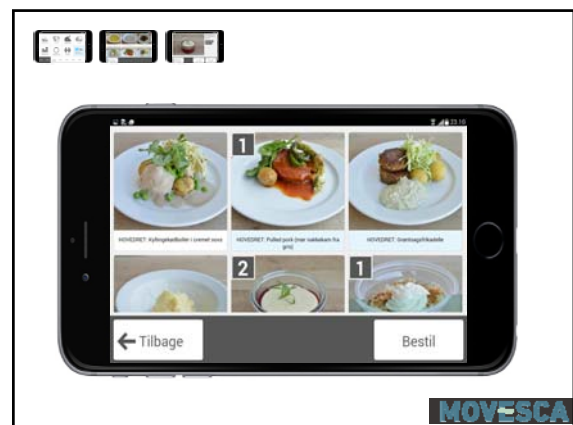

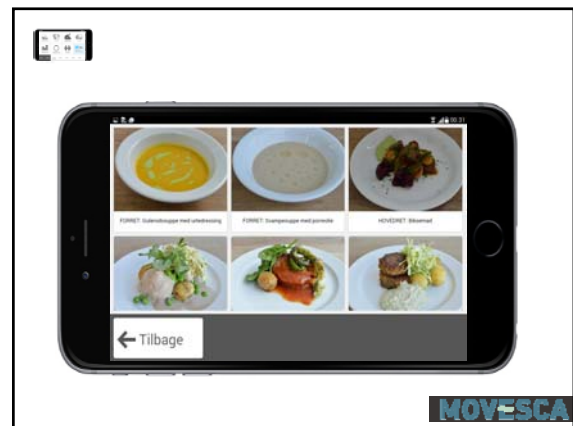

MEDSKABEREN: "Jeg vil have..."

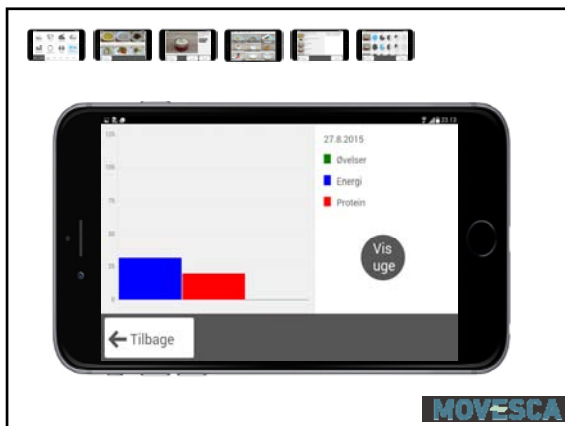

VINDEREN: "Jeg vil have..."

TÆNKEREN: "Jeg vil have..."

MAKKEREN: "Jeg vil have..."

COPENREHAB

- Prioriteret understøttelse af personale
- Involvering af pårørende hvis patient giver tilsagn
- Empowerment til både patienter og pårørende

Overall status – we're on the move

Market

MinMenu platform being implemented with three customers

- Region Hovedstadens psykiatri – Glostrup Hospital
- Herlev Hospital
- Gentofte Hospital (Q1 2017)

Product

MinMenu – hospital version 1.0 is in production

- Code base has been refactored and prepared for scaling
- We are about to start phase two project with patient associations

Financing

A mix of personal loans, investments, grants and revenue

- Grant from Innobooster Dkr. 2 Mill. in April 2016
- Received Dkr. 3 Mill. equity investment on 1. January 2017
